N2151 Encoder

Video-Over-IP Matrix Switching Solution
ANY SOURCE, ANY DISPLAY, ANYWHERE

Design an AV system with SVSi and your conference room, corporate campus, and world-wide enterprise facilities can connect and share media utilizing standard IP-based equipment as the infrastructure. SVSi utilizes Gigabit Ethernet as the backbone of our Digital Media Distribution and Switching system with equipment specifically designed for the local in-room, LAN, and WAN environments. This means your AV System will have the ultimate in flexibility and versatility with I/O that can expand when you need it to in increments of one.

Use the world's most accepted networking standard (IP) and build your AV solution with confidence knowing you can take on any innovation in display resolution technology... now and in the future!
